

APPLICATION

STRAWBERRIES

PRODUCT	TIMING	MODE OF ACTION	CONCENTRATION	FREQUENCY
microfertile® plant	Early stages and vegetative and reproductive growth, before/after frost	Increases growth and chlorophyll, early vigor and cold resistance	10 L / ha	2-3 foliar applications
ekofertile® plant	At all stages, especially during infection/pre-dry periods	Increases root system, flower formation, activates SAR and ISR; improves UV, drought and disease resistance, fruit size	10 L / ha	2-3 foliar applications

Observed effects:

- Better tolerance to transplant shock
- Faster growth after transplanting / after winter
- Higher vitality
- Better overwintering and less frost damage
- More flowers and more fruit per plant
- Larger fruit
- Higher sugar content/Brix
- Better taste and aroma
- Minimal sunburn
- Improved immunity and less disease
- Much higher yield (up to 60%)
- Soil regeneration

Do not apply before expected rain, min. 8 hours for absorption, 10-30°C, apply after rain to activate systemic resistance SAR and ISR.
